

The logo for NewBlock+ BioPharma features the text "NewBlock" in a bold, sans-serif font, with "BioPharma" in a smaller font below it. A large, light blue plus sign is positioned to the right of the text. The entire logo is set against a white background.

NewBlock+
BioPharma

A dynamic splash of clear water is captured in mid-air, creating a sense of movement and freshness. The water droplets are sharp and detailed, with some appearing as small spheres and others as elongated streaks. The background is a soft, light blue gradient.

Sensitive goods in
professional hands.

What Newblock can do for you?

The Biopharma Division is specialized in transport of clinical and whole medical research shipments and logistic management.

- Assistance with permit applications including import permits, Ministry of Health authorizations, etc.
- Personalized services.

Whatever is your inquiry Newblock Biopharma has the better solution for you.

Biopharma

Our service offerings include temperature-controlled and time-critical handling and transportation.

Newblock is monitoring each shipment with individual care, we are providing the right thermal solution and treat as per goods needs.

We know that the most important is that your goods must perseve in the correct temperature and arrive always in time.

The temperature ranges are:

- Ambient controlled: +15/+25° C

- Refrigerated: +2/+8° C - Frozen:

- 20° C (Gel Pads)

- Frozen: -80° C (Dry Ice)

- Deep Frozen: -180° C (Liquid Nitrogen Vapour Shippers) As an expert in transportation, we can import and export your consignments as an approved carrier, with a custom broker licence, an IATA DG license and Regulated Agent status, as Newblock is an IATA Agent.

Newblock Biopharma also can offer a wide range of packaging solutions to suit your shipping needs.

Packaging

Specimen integrity is crucial to clinical trial, that's why to support investigator sites, Newblock can offer full-service packaging at the site depending on their needs.

In such a way, the integrity of the specimens are carefully protected from the moment it leaves the site until it arrives at the other laboratory/consignee.

Our range of specialist product packages is available in a variety of sizes to suit most applications:

- Isothermal boxes for ambient controlled, refrigerated and frozen shipments
- Gel pads for ambient, refrigerated and frozen shipments
- Dry Ice for frozen shipments
- Replenish of Liquid Nitrogen Vapour shippers for deep frozen shipments
- Approved bioboxes/bags/boxes for infectious samples.

All the types of packaging are validated and your goods will be packed and transported accordingly to the regulations.

Logistic Management

Newblock Biopharma can offer a complex transport logistic management with 24 hours a day/7 days a week/365 days a year support.

Whether you are a small start up Research Company or a large Pharma Organization, Newblock Medical can cater for your needs.
